PATENTED GERFLOR TECHNOLOGY

Gerflor: at the heart of cutting-edge technology
At our three Research & Development centres, seventy engineers work in partnership with Laboratories and Universities worldwide to develop innovative solutions for environments with strict technological constraints (such as the aircraft industry, for example)

A new generation
of surface treatment for the floor coverings of the future

evercare™ on MIPOLAM

an exclusive Gerflor patented coating with resistance and performance obtained by UV laser cross-linking

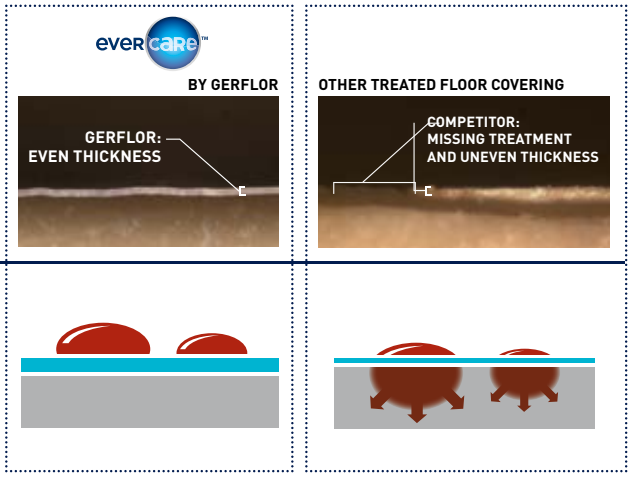

EVERCARE™ TECHNOLOGY

AN EXCLUSIVE PATENTED TECHNOLOGY BY GERFLOR

THE BEST CHEMICAL STAIN RESISTANCE SURFACE TREATMENT

Highly Durable: Exclusive surface treatment applied by UV laser cross-linking provides superior durability and an even surface thickness, creating an impenetrable barrier against stains and chemicals found in healthcare.

Life expectancy of over 20 years.

100% non-porous surface:
The surface treatment creates a 100% non-porous barrier to all liquids and chemicals, keeping all stains floating on the surface.

Simple and easy stain removal.
